Profile

Experienced Full Stack Software Developer with a proven track record of delivering high-performance, scalable web applications. Skilled in leveraging modern technologies such as Angular, and SpringBoot to build robust and user-friendly solutions.

WORK EXPERIENCE

CONPRG Technologies

Senior Angular Developer — Jan 2026 - Present

- Converted a PowerBuilder application to modern web UI using Angular.
- Modernized a 2-tier application to a 3-tier application using Quarkus Java API.
- Utilized JIRA to track productivity and maintain progress on time.

PowerSchool India Pvt Ltd

Associate — Jul 2024 - Jan 2026

- Developed and researched Angular libraries to increase the scalability and performance of applications.
- GitLab was used to manage version control and continuous integration procedures, guaranteeing efficient code deployment and teamwork.
- Strong problem-solving abilities were displayed, swiftly recognizing and fixing problems to preserve application performance and functionality.
- Worked well in cross-functional teams to complete projects on schedule and within budget, which improved team performance and client satisfaction.

Solvedge Inc

Trainee Developer — Jul 2022 - Jun 2024

- Developed and maintained responsive web applications using Angular (v14), enhancing performance and user experience.
- Implemented reusable UI components, forms, and data-driven features, reducing development time and improving scalability.
- Integrated RESTful APIs with Angular services for seamless communication with backend systems (Spring Boot).
- Collaborated closely with backend developers, QA engineers, and UX designers to deliver features aligned with business needs.
- Participated in code reviews, testing, and CI/CD deployments, ensuring high-quality, maintainable releases.

EDUCATION

University Of Madras art and science College

Bachelor of Commerce Computer Application - 6.2 — Jul 2016 - Apr 2019

PROJECTS

I.Pharmacy

- Transformed a legacy PowerBuilder application into a modern web-based interface leveraging Angular for enhanced user experience and improved scalability.
- Migrated a 2-tier application to a 3-tier architecture utilizing Quarkus Java API, resulting in improved system efficiency and maintainability.
- Utilized JIRA to effectively track productivity, monitor progress, and ensure timely completion of tasks, optimizing project management and delivery.

Neverskip

- Built using Angular (frontend) and Core PHP (backend). Developed a full-featured application for schools to digitize academic and administrative operations.
- Built dynamic academic configuration (subjects, marks, exams, timetables).
- Implemented customizable forms for admissions and events.
- Automated ID card generation and event management.
- Integrated multi-channel communication (WhatsApp, email, SMS).
- Designed attendance tracking and exam mapping modules.
- Added real-time GPS tracking for school transport safety.

RecoveryCoach

- Built using Angular (frontend) and Spring Boot REST APIs (backend). Contributed to the development of a platform that streamlined healthcare operations and improved patient management.
- Implemented patient registration and appointment scheduling modules.
- Designed dynamic forms for patient records, admissions, and discharges.
- Integrated billing and invoicing system with insurance support.
- Developed doctor and staff management features, including rosters and shifts.
- Added alerts and notifications for appointments, reports, and follow-ups.
- Ensured data security and compliance with healthcare standards.

SKILLS

- Frontend: Angular (v2–20), JavaScript, React (Basics)
- Backend: Spring Boot 3 (REST API), Java (basic knowledge)
- Database: SQL (Basics)
- Tools & DevOps: PuTTY (Linux server management), Git, SVN, CI/CD pipelines
- Github co-Pilot Prompting to develop code
